DETAILED ACTION

The amendment filed on September 30, 2003 have been received and entered into the application. Accordingly, claims 8 and 9 are withdrawn from consideration.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Takebe et al. (U.S. Patent No. 5,885,632).

Takebe et al. teach a food product prepared from a pulse crop (grains) as a starting material comprising fermentation to inhibit contaminants wherein the fermentation time depends upon the type of koji mold and a koji preparation comprising cooking pulse crop and hydrolyzing koji preparation by adding water comprising at least 70 wt% isoflavone aglycone (daizein) set forth in claims 1-7. (title, abstract, column 6, lines 48-49, column 7, lines 15-17, column 8 particularly, table 3, column 12, claims 7-10).

Applicant's recitation in claims 1-7 of an intended use of the material as being an anti-obesity material does not represent a patentable limitation since such fails to impart

Art Unit: 1617

any physical limitation to the same composition taught by the prior art. Moreover, the oral supplement set forth in claim 7 would be inherent in the same composition taught by the prior art as being a food product.

For these reasons the claimed subject matter is deemed to fail to patentably distinguish over the state of the art as represented by the cited references. The claims are therefore properly rejected under 35 U.S.C. 102(b).

None of the claims are allowed.
